## ALARMS

Our sleek looking Raptor smoke alarms have been **purpose made for Australian Standards** and approved for every State's fire safe regulatory requirement.

Raptor smoke alarms have been rigorously tested, in the most robust laboratory tests, to activate when smoke is detected. Simply put, they have been **designed to deliver the fundamental feature of detecting smoke in order to save lives and homes in thousands of Australian premises.**

### Raptor Alarms Key Features and Benefits:

- Wireless interconnected smoke alarm with 10 year battery, eliminating late night low-battery chirps and battery replacement costs.
- Advanced photoelectric sensing technology complies with new Australian industry standards to reduce cooking nuisance alarms and provides early warning in a home fire emergency.
- Interconnected – when one alarm sounds, all interconnected alarms will sound, providing comprehensive protection for your family.
- Equipped with an alarm memory providing a visual indication when an alarm has been activated.
- Tests alarm circuitry and activates silence feature to temporarily silence alarms for up to 10 minutes.
- An end of life warning will let you know when it's time to replace the alarm and the warning can be silenced.

| Technical Specifications |                                     |
|--------------------------|-------------------------------------|
| Sensor Type              | Photoelectric                       |
| Power Supply             | 3V sealed battery                   |
| Battery Life             | 10 Years                            |
| Audio Alarm              | ≥85dB/3m                            |
| Interconnection          | RF433 – Wireless: 40 alarms maximum |
| Working Temperature      | 0~50°C                              |
| Working Humidity         | ≤95%RH (no condensation)            |
| Plastic Material         | ABS+PC, UL94 V0 fire retardant      |
| Dimensions               | 125*125*46 mm                       |
| Installation Positions   | Wall mounting/Ceiling mounting      |
| Mounting Type            | Mounting bracket                    |
| Certification            | AS3786 2023                         |

| Product Code | Product Description                                                                        |
|--------------|--------------------------------------------------------------------------------------------|
| RH638-AC-RF  | Hardwired, photoelectric, wireless RF interconnected, 10 year back-up battery smoke alarm. |
| RH638-B-RF   | 10 year battery powered, photoelectric, RF interconnected smoke alarm.                     |
| RHRC2        | Smoke Alarm Remote Control.                                                                |
